DHANRAJ SINGH

Software Engineer | Distributed Systems & High-Concurrency Architecture

Email: dhanrajsingh.dev@gmail.com | Portfolio: Built with pure HTML/CSS | GitHub: github.com/dhanrajsingh

PROFESSIONAL SUMMARY

Software Engineer specializing in scalable backend architectures, distributed microservices, and high-performance systems. Proven track record in optimizing latency, tuning database performance, and building resilient APIs.

CORE TECHNICAL SKILLS

Languages: Python, Go, Java, TypeScript, C++, SQL
Backend & Systems: Spring Boot, Node.js, FastAPI, Apache Kafka, gRPC, RESTful APIs
Databases & Storage: PostgreSQL, Redis Caching, MongoDB, MySQL, Elasticsearch
Cloud & DevOps: Docker, Kubernetes, AWS, CI/CD GitHub Actions, Linux

WORK EXPERIENCE

Software Engineer | High-Growth Tech Enterprise (2023 - Present)

- Architected microservices serving 500k+ daily requests with 99.99% uptime and zero-data-loss pipelines.
- Refactored database queries and implemented Redis caching, reducing P95 latency from 320ms to 45ms.
- Automated Docker-based CI/CD workflows, shortening deployment cycle times by 60%.

Associate Software Engineer | Innovative Cloud Solutions (2021 - 2023)

- Built resilient RESTful and gRPC microservices for enterprise cross-platform synchronization.
- Achieved 88%+ automated test coverage across critical transaction endpoints.

EDUCATION

Bachelor of Technology in Computer Science - Honors

Relevant Coursework: Distributed Systems, Operating Systems, Advanced Data Structures, Networks.
